

The Kelly Group Credit Consulting, Inc.

As we are sure that you are well aware, it is very wise to check your credit from time to time to make sure that your credit is accurate and at an optimal level. This has never been as true as it is today. Decisions on everything from career opportunities to insurance are being made based, in large part, on your credit. Having inferior credit you could be costing yourself thousands of dollars each and every year. It is always better to identify a problem early and easier to correct it once you are aware of it.

The Kelly Group is here to help. This credit consultation or credit check-up will help you become aware of where your credit stands at the moment. Our credit experts will thoroughly analyze your credit. We can then advise you what you are doing correctly with regards to your credit and what you can do to improve your credit for both the short and long term.

Please file out a copy of the attached sheet for each person you would like to receive a credit consultation.

Sincerely,

Jeanne Kelly
